About Inferno

Inferno is a Monopoly-based interactive multiplayer game Discord bot completely themed around Sin City — Las Vegas. The moment you step into the game you enter the glittering, dangerous world of Vegas. Visit all the famous attractions, purchase them, collect rent, gamble at the slot machines, land yourself in great trouble (smuggling, hush money, police raids) or in great luck (jackpots, high-roller bonuses, celebrity sightings). At the end, the player with the most combined balance and property value is crowned the Conqueror of Sin City.

How to Play

1. One player types /play in any text channel. A lobby opens with Join Game and Start Game buttons.
2. Other players (up to 5 total) click Join Game to enter the lobby.
3. The host clicks Start Game when everyone is ready. Minimum 2 players required.
4. Players take turns clicking Roll Dice. The bot moves your token and resolves the tile you land on.
5. Buy properties, pay rent, spin slot machines, survive event cards, and avoid going bankrupt.
6. The game ends when any player completes 4 full laps, or a player goes bankrupt.
7. The final leaderboard is displayed — ranked from highest to lowest total wealth.

Slash Commands

Command	Description
/play	Create a new game and open the lobby. The host can invite others to join.
/status	Show current player balances, board positions, lap counts, and properties owned.
/exit	Force-end the current game and display the final leaderboard standings.

Game Rules

Starting Balance

Each player starts with $1,500 reputation (in-game currency).

GO

Passing GO awards +$50. Landing directly on GO also awards +$50.

Properties

Landing on an unowned property shows Buy and Skip buttons. Buying a property marks that tile with your player colour on the live board image. Landing on a property owned by another player deducts rent from your balance and transfers it directly to the owner.

Jail

Landing on the Go To Jail tile teleports you to Jail immediately.

Landing on the Jail tile (visiting) costs a $200 fine — you are not locked in.

If you are in Jail on your turn, pay $150 bail to escape and roll normally, or roll dice and escape for free if you get doubles.

Slot Machine

Landing on a Slot Machine tile shows Spin and Skip buttons. Each spin costs $50 upfront. Outcomes are weighted:

Tier	Probability	Outcome
JACKPOT	5%	+$300
BIG WIN	10%	+$150
WIN	20%	+$75
PUSH	25%	+/- $0
LOSS	20%	-$75
BIG LOSS	14%	-$150
RUINOUS	6%	Lose entire balance

Event Cards

The active player draws a hidden event card (gain or loss of reputation).

All other players have 10 seconds to vote: Support, Oppose, or Skip.

Supporters and opposers win or lose a side-bet worth 20% of the card value.

The card and all effects are revealed after the voting window closes.

Free Parking

Nothing happens. A safe rest tile.

End Game — Leaderboard

The game ends when any player completes their 4th lap of the board, or when a player goes bankrupt (balance reaches zero). The final leaderboard ranks all players by Total Wealth = Cash Balance + Sum of Property Purchase Prices. The player with the highest total wealth is ranked first and wins the game. Rankings decrease from most wealthy to least.

Rank	Player	Cash	Properties	Total Wealth
1st	Player 1	$1,240	$880	$2,120
2nd	Player 2	$890	$740	$1,630
3rd	Player 3	$420	$580	$1,000
4th	Player 4	$180	$300	$480

Board Reference

The Inferno board contains 40 tiles arranged in a clockwise loop, themed around Las Vegas landmarks. Below is the complete tile list with prices and rents.

#	Name	Type	Price	Rent
